

What is TeleHealth?

Solace Home Healthcare

TeleHealth is an alternative to typical home health service delivery that provides real-time interactions between qualified healthcare providers and families using a device, a camera and the Internet.

Solace Home Healthcare's TeleHealth has many benefits specifically for the Early Intervention population:

- Assists in meeting 28 day timelines
- Allows better access in rural, hard-to-reach areas
- Bridges gaps in services for families
- Allows better access to providers utilizing the funding hierarchy
- Can be used as a coaching model
- Available for immune-compromised children

Here are a few examples when a TeleHealth visit would be a great option:

- Child receives services with a daycare provider. Parents can "call in" to sessions and be a part of therapy.
- Family takes an extended vacation. Provider continues services while family is out of town.
- A blizzard strikes Denver metro area. Provider treats via TeleHealth and has no cancellation.
- Child or provider has a contagious cold, but feels OK. Provider continues visits without setbacks in progress.

And many, many more opportunities.

Solace Home Healthcare provides exceptional speech therapy, physical therapy, occupational therapy and nursing services to children and adults at home. Our mission is to bring solace to those in need.

“As a mom and physical therapist, I know that all children develop at their own pace and with various strengths and challenges. Just as a block tower needs a solid base to build upon, so does your child. As a therapist, I can help you identify which motor milestones your child has achieved, and which ones come next in order to successfully navigate through your child’s environment. Thank you for inviting me into your home.” — Christine, TeleHealth Clinician

What Do I Need to Participate?

- **Device** — Can be laptop, desktop, or tablet
- **Camera** — Any type of webcam including those on laptops, desktops, tablets, as well as external cameras
- **Internet** — High speed Internet is necessary; wireless works, plug in is best

What if I do not have equipment?

No Problem! We have options available so anyone can access Telehealth services.

If you are not able to provide any of the following, please contact the Solace Home Healthcare office to inquire about available options.

Specific System Requirements
